PROFESSIONAL SUMMARY

Software Developer and Application Support Specialist with 3+ years of experience in business application development, technical support, system implementation, and client training. Experienced in Laravel, PHP, MySQL, and VB.NET, with practical skills in legacy system maintenance, database troubleshooting, software testing, and translating client requirements into system enhancements.

TECHNICAL SKILLS

- **Programming:** PHP, VB.NET, JavaScript, SQL, HTML5, CSS3
- **Frameworks & Database:** Laravel, Blade, Tailwind CSS, MySQL, SQL Yog, phpMyAdmin
- **Development Tools:** Git, GitHub, Visual Studio, VS Code, ChatGPT
- **Development & Support:** Application Enhancement, Debugging, Database Troubleshooting, System Testing, Requirements Gathering, Deployment, Technical Documentation, Client Training, Data Migration

PROFESSIONAL EXPERIENCE

Emergence Systems and Solutions — Zamboanga City, Philippines

Support Programmer | February 2025 – Present

- Develop and enhance business applications and internal systems using Laravel, PHP, MySQL, and VB.NET.
- Modify legacy desktop applications and collaborate on migrating web-based enterprise systems to VB.NET desktop applications.
- Investigate escalated application and database issues, identify root causes, and coordinate technical resolutions.
- Gather client requirements, document enhancement requests, and test and deploy validated system changes.
- Coordinate software demonstrations, client implementations, system configuration, and end-user training.
- Contribute to internal Laravel projects and guide OJTs in development and technical tasks.

Technical Support Specialist | June 2023 – February 2025

- Provided first-line technical support, troubleshooting, and application assistance for business systems.
- Debugged legacy applications and performed minor code modifications to resolve technical issues.
- Installed, configured, and deployed software in client environments.
- Assisted with database investigation, data validation, client onboarding, and user training

PROJECT EXPERIENCE

Student Performance Monitoring System (SPMS) — Freelance Project
Solo Developer | Laravel Web Application

- Developed a web-based academic monitoring system for managing student grades, attendance, and academic performance.
- Implemented role-based dashboards, configurable grading and attendance thresholds, and academic risk alerts.
- Designed database structures and workflows supporting academic records and student performance monitoring.

Shipyard Enterprise System — Company Project
Developer Collaborator | VB.NET Desktop Application

- Developed selected modules covering vessel registry, tariff management, and project management.
- Contributed to the migration of a legacy web-based system to a VB.NET desktop application.
- Assisted with application testing, debugging, and database investigation.

ESS Sentinel — Internal Company Project
Solo Developer | Laravel Web Application

- Developing an internal infrastructure and support knowledge management system using Laravel, PHP, and MySQL.
- Designing centralized records for clients, branches, devices, system deployments, incidents, and technical solutions.

Task Management System — Internal Company Project
Developer Collaborator & OJT Mentor

- Contributed to the development of an internal Laravel task management application.
- Guided OJTs in development tasks and implementation activities.

Digital Library System — Capstone Enhancement Project
Main Developer | Laravel Web Application

- Developed an enhanced library management application with collection management, circulation tracking, borrower records, and audit logging.
- Implemented reporting, PDF export, barcode generation, and Excel import/export.
- Designed relational database structures and implemented library transaction workflows.

EDUCATION

Bachelor of Science in Information Technology
Major in Database Systems
Mindanao State University – Buug Campus
2019 – 2023 | **Cum Laude**
