Cum Laude
Mindanao State University – Buug Campus
Buug, Zamboanga Sibugay

SKILLS & EXPERIENCE

- **Programming & Web Development**
  - HTML, CSS, Java Script, PHP, VB.NET, Laravel
- **Database Management**
  - SQL Yog, MySQL, Data migration, CSV import/export, Database alignment
- **Tools & Software**
  - GitHub, MS Office, Visual Studio
- **Professional Attribute**
  - System implementation and deployment
  - Client onboarding & training
  - First-line technical support
  - Requirement gathering & documentation
  - Legacy system stabilization & migration
  - Internal tool development (Error Registry, Task Management System)
  - Team mentoring & coordination

WORK EXPERIENCE

Company Name: Emergence Systems and Solutions
2/F RGS Copra, Marmoleño Drive, San Jose St.,
Baliwasan, Zamboanga City 7000 Philippines

Duration of Employment: February 2025 – Present
Position: **Support Programmer**
Duties:

- Led the implementation team and assisted support personnel in SME system deployment and client onboarding.
- Documented client customization requests and escalated requirements to development team.
- Collaborated on Shipyard Management System: stabilized legacy PHP system, added modules, fixed financial functions, and optimized performance.
- Participated in migration of legacy system from PHP to VB.NET.
- Developed internal Laravel systems (Error Registry System, Library Management System) to streamline support workflows and improve operational efficiency.
- Mentored interns and supervised ongoing projects (Task Management System).

Duration of Employment: June 2023 – February 2025
Position: **Technical Support Specialist**
Duties:

- Installed, configured, and deployed SME systems for clients.
- Conducted user training and system onboarding.
- Provided first-line technical support and troubleshooting for client-reported issues.
- Managed data migration by cleaning and restructuring client-provided Excel files for bulk import into databases, reducing manual entry and minimizing errors.
- Streamlined workflows to enhance adoption and operational efficiency.

KEY STRENGTHS

- ❖ Strong understanding of client workflows and system implementation
- ❖ Ability to stabilize and improve legacy systems
- ❖ Hands-on experience in end-to-end system deployment, data migration, and development
- ❖ Leadership and mentoring experience
- ❖ Adaptable to new frameworks and technologies
